

USB Wristband Order Form

CICADA Queensland offers a USB MEDICAL ALERT! wristband for persons to store their medical information, particularly about their cochlear implant, in the event of an emergency.

You can keep your medical information up-to-date on this USB flash drive as follows:

1. Keep a copy of your medical information as a Word document on your computer or separate USB flash drive. Ensure that your name and current address is included.
2. Your medical information should also include a photocopy of your driver's license or other ID; next of kin details; clinic and audiologist details; GP and ENT specialist details; the brand of implant; any other medical issues and a list of current medications.
3. You can keep this medical information updated by modifying, deleting or adding new information as appropriate to this Word document.
4. Save this updated Word document as a PDF document.
5. Save a copy of this PDF document to your USB wristband.
6. Make sure that the old PDF document is deleted from the USB wristband.
7. You could also write your name and address on a small sticker and place on the other side of band, in case the wristband is misplaced when removed.

The total cost of one (1) USB wristband only is \$10.00 each. This price for one USB wristband includes postage to anywhere in Australia.

If you wish to order more than one USB wristband, postage is extra. Please contact the Secretary on secretary@cicadaql.com.au for the total cost of an extra number of bands and the associated postage.

Delivery time for orders on payment is 7 to 10 working days.
