

In 2014 CICADA Queensland published the book, *Real People, Real Stories*, a series of stories of people with cochlear implants detailing their journeys.

Now in 2016, the organisation brings you the follow up to the successful first edition, which includes follow ups on those recipients featured in the first book.

The stories in this new book continue to touch lives being changed by joining the world of sound once more, or for the first time, and with compliments of one of the great Australian inventions—the cochlear implant.
